Build on your homesite with Veev

Veev offers a **Build-On-Your-Homesite (BOYH)** program that allows homeowners and investors to develop precision-engineered homes on land they already own or land you help them acquire.

Backed by Lennar, one of America's leading homebuilders, Veev offers precision-manufactured, factory-built homes on client-owned land in **half the time** and at **half the cost** of traditional construction.

Benefits for your clients

Lower Construction Cost = Better Client ROI

Veev builds at ~\$275/sf vertical and ~\$400/sf all-in — versus \$600–\$800+ for traditional construction. Fixed-price contract, no change orders.

Monetize Vacant or Underutilized Land

Clients with vacant or underbuilt parcels can generate rental income, sell at a significant premium, or turn idle land into real returns.

Dramatically Increase Property Value

A Veev home on an underbuilt lot increases property value with little to no cost to the landowner, and a higher-value sale means a higher commission for you.

Closing Certainty, Backed by Lennar

Backed by Lennar, one of the largest homebuilders in the US. Veev offers financial strength and execution certainty.

17+ years in CA

Backed by Lennar

Fixed price, no change orders

~4 months construction from permit
